

“The best time to plant a tree is 20 years ago,
the second best time is now”

TREE CERTIFICATE

This certifies that 500 trees will be planted in Ethiopia, Amhara Region
by WeForest for Experience Scotland (event ref: INC/2736)

Trees are one of the most effective solutions to halt global warming due to the
carbon they remove from the atmosphere.

Trees also contribute greatly to balancing the water cycle, improving soil fertility
and improving quality of life for the poorest communities.

Congratulations for Making Earth Cooler!

Marie-Noëlle Keijzer
CEO, WeForest
